ELIMINATE FOUL ODOURS – REGULAR USE

"Creators of
new technologies
for professional
hygiene."

Description

Nu-Odor Freshness™ is an extremely powerful odour control product that uses biotechnology to eliminate unpleasant odours caused by organic matter. It can be used on all surfaces, as well as on carpets, curtains and fabrics.

Applications

Nu-Odor Freshness™ effectively eliminates odours caused by cigarette smoke, pets, litter boxes, sports bags, laundry bins, etc. **FOR PROFESSIONAL USE.**

Directions

Nu-Odor Freshness™ comes ready to use. Spray directly on surfaces where odours are detected.

Odours on surfaces - Manual use: ① Identify the surfaces that are generating foul odours. ② Clean them if necessary. ③ Using a spray bottle or dispenser, mist the surfaces with the product. ④ Let stand. ⑤ Repeat as needed.

Odours on fabrics or carpets - Manual use: ① Identify the surfaces that are generating foul odours. ② Clean them with **Nu-Karpet Kare™** if necessary. ③ Using a spray bottle, mist the surfaces with the product. ④ For severe problems concentrated in one area, it may be useful to gently scrub the fibres with a brush to help the product penetrate deeply. ⑤ Let stand. ⑥ Repeat as needed.

Cleaning tips

- Precisely locate the source of the odour.
- Spray the product directly on the source of the problem.
- Never mix products.

ELIMINATE FOUL ODOURS – REGULAR USE

Respect for the environment

Tips for being greener

Follow work procedures ■ Do not use fragrances to try to mask odour problems ■ Never use chlorinated cleaners or products (bleach) ■ Do not use disinfectants to try to resolve hygiene and odour problems ■ Train staff on the environmental impact of their work.

Environmental benefits

Reduced environmental stress ■ Low aquatic toxicity and readily biodegradable (according to OECD 301 series tests) ■ Reduced chemical waste ■ No VOCs ■ Elimination of VOC-generating automatic fragrance dispensing systems and reduction of sick building syndrome ■ Reduced energy use since there is no need to refrigerate waste storage rooms ■ Reduced energy use due to effective cleaning without hot water.

Fits perfectly into any organisation's efforts to be more eco-responsible by going green.

Technology

The technology behind **Nu-Odor Freshness™** is based on competitive bacterial cultures that are specially formulated to quickly decompose organic matter. A key feature of these cultures is that they grow rapidly, filling the treated area before smelly microbial species take over the organic matter and create foul odours.

Composition

<5% non-ionic surfactants, fragrance, bacterial cultures, preservative.

Properties

Amber liquid, fresh mint scent.

Regulatory compliance

This preparation is not classified as hazardous according to European Directive 1999/45/EC and its amendments. Not regulated by the regulation on transport of dangerous goods

Material safety data sheet available upon request. Read it before using this product.

Safety advice: S25 - Avoid contact with eyes. **S26** - In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
